

Privacy Policy

Last Updated: August 28, 2026

This Privacy Policy explains how Meme Saver collects, uses, and protects your information when you use our browser extension, website, and backend infrastructure.

1. Information We Collect

We prioritize data minimalism and do not collect personally identifiable information (PII) such as your real name, physical address, or email unless voluntarily provided for support purposes.

- **Public Wallet Addresses:** When you connect your Web3 wallet or authenticate via cryptographic message signing, we store your public wallet address to verify subscription tiers and usage quotas.
- **Device Identifiers:** We record an anonymized device fingerprint or ID (`device_id`) solely to enforce our single-device subscription policy.
- **Local Storage:** The browser extension stores your authentication token (`userAuthToken`) locally within your browser environment using standard Chrome storage APIs.
- **Server Logs & API Telemetry:** Our backend logs standard HTTP request metadata (IP addresses, endpoints accessed, request timestamps) for security, rate-limiting, and debugging purposes.

2. Third-Party Data Processors

To deliver our services, we interact with select third-party infrastructure providers who adhere to their own privacy standards:

- **Supabase:** Used for secure database management and user license validation.
- **Helius & Solana RPC Nodes:** Used to query public blockchain transaction history. No private keys or personal identifiers are transmitted to RPC nodes.
- **OpenRouter / AI Providers:** Used to process analytical text prompts. Queries contain anonymized transaction metrics and token metadata, never user identities.

3. Data Security

We implement industry-standard security measures, including encrypted database connections (SSL/TLS) and strict Role-Based Access Control (RBAC) via Supabase, to protect your data against unauthorized access, alteration, or disclosure. However, no method of transmission over the internet is 100% secure.

4. Children's Privacy

The Service is strictly intended for individuals over the age of 18. We do not knowingly collect or solicit data from anyone under the age of 18.

Risk Disclosure & Financial Disclaimer

Last Updated: August 28, 2026

1. Extreme Risk of Digital Assets

Trading and investing in cryptocurrencies, digital tokens, smart contracts, and specifically decentralized meme coins (e.g., assets on Solana, Pump.fun, Raydium) carry a **substantive risk of complete financial loss**. Prices are highly volatile and can drop to zero instantly due to market manipulation, regulatory shifts, lack of liquidity, or malicious developer actions ("rug pulls").

The Meme Saver extension only collects an anonymous Device ID to manage usage limits (Free Tier) and does not sell any data to third parties. The scanned wallet addresses are public blockchain data.

2. No Endorsement or Guarantee

The inclusion of any token, contract address, or wallet tracking metric within Meme Saver **does not constitute an endorsement, verification, or guarantee of safety**.

- Our algorithms and artificial intelligence models are designed to flag statistical anomalies, concentration risks, and historical behavior patterns. They **cannot** prevent losses, predict future price movements with certainty, or detect zero-day exploits and sophisticated honeypots.
- A "Safe" or high "Trust Score" rating does not mean a token is risk-free. Conversely, "Avoid" ratings reflect algorithmic heuristics and may occasionally flag legitimate projects.

3. User Sole Responsibility

You acknowledge that you are executing all cryptocurrency transactions entirely at your own discretion and risk. You must perform your own independent research (DYOR — Do Your Own Research) before committing any funds. Never risk capital you cannot afford to lose.
