

MEME SAVER - COOKIE POLICY

Last Updated: August 2026

1. WHAT ARE COOKIES? Cookies are small text files stored on your device when you interact with our web terminal or browser extension.

2. HOW WE USE COOKIES AND LOCAL STORAGE Meme Saver heavily relies on `localStorage` and strictly necessary cookies to function as a Web3 decentralized application (dApp).

3. TYPES OF COOKIES WE USE

- **Strictly Necessary (Web3 Authentication):** We use local storage to remember your wallet connection state (e.g., Phantom wallet adapter) and your securely generated Sync Key. Without these, the platform cannot verify your Pro/Premium subscription and will not function.
- **Security & Anti-Fraud:** Tokens used to prevent cross-site request forgery (CSRF) and to rate-limit API calls to our backend.
- **Preferences:** UI settings (e.g., keeping the Network Health panel closed or open).

4. NO THIRD-PARTY TRACKING COOKIES We do not use invasive third-party marketing cookies (like Facebook Pixel or Google Ads trackers). Our focus is on raw on-chain performance, not selling your browsing habits.

5. MANAGING COOKIES You can clear your browser's local storage and cookies at any time via your browser settings. Be aware that doing so will disconnect your Web3 wallet and require you to re-authenticate your Premium tier via the Dashboard.
